1. How can I tell if a publication—a journal, a magazine, etc.—is popular or scholarly?

2. Here are two (of the many) types of scholarly articles—
   a. What is a research article? Read an abstract of a research article, here.
   Features to note: multiple authors; statement of the researchers’ question; methods they used to try to answer it; study population or sample; data they collected; their conclusions
   b. What is a review article? Read an abstract of a review article, here.
   Features to note: single author; no methods OR methods are literature searching; no specific study population or sample; mentions of evidence from the literature

3. What is peer review? (video)

4. How do I find articles using UT Libraries databases?

5. How do I create a search strategy to use in a database?
